

Enabling  
Proactive  
Decisions  
  
Smart. Innovation.

Thank you for joining us at  
**ANESTHESIOLOGY® 2018**

Visit the Edwards Education Resource Center for hemodynamic resources such as video presentations and product specific training modules. Our newly designed website includes a comprehensive portfolio of tools and is complemented by a series of education-based apps.

Know more. Know now. ►

**Fluid Response Simulator**

Learn methods for assessing fluid responsiveness in this iPad simulation app available on Apple App Store.

Experience Edwards' comprehensive portfolio of innovative solutions that enable proactive clinical decisions.

**ClearSight system**

The noninvasive ClearSight system provides valuable hemodynamic insight to an expanded patient population, for making more informed decisions about fluid and hypotension management in moderate- to high-risk surgical patients.<sup>1-3</sup>

The ClearSight finger cuff technology is compatible with the EV1000 clinical platform.

[Know more](#) ►

**FloTrac system**

The FloTrac system is the practical, reliable solution used and trusted by clinicians more than other minimally-invasive volume management solution worldwide.

The FloTrac sensor is compatible with the EV1000 clinical platform.

**Discover our first-of-its-kind predictive hypotension management software.**

Hypotension Prediction Index software detects the likelihood of a hypotensive event\* before the event occurs, and provides you with insights to understand the root cause and inform a potential course of action for your patient.

\*A hypotensive event is defined as MAP < 65 mmHg for at least one minute duration.
